CUHK EE programme admits students directly through

• JUPAS channel
• SNDAS channel
• Other admission channels (for applicants with other academic qualifications such as Associate Degree/ Higher Diploma, IB, GCE AL, etc.)

Our mission is to educate future leaders in electronic engineering, to pursue knowledge and advance state-of-the-art electronics, including hardware, software and design with electronics as the core, from materials, devices, circuits to systems, and the applications of such technology to meet societal and individual needs. In both teaching and research, the Department is guided by the highest international standards.
Student Whole-person Development

Work-Study Programme 工讀計劃

Our work-study programme was first introduced in 1975 in the belief that combining course work and industrial training would narrow the gap between academic education and practical engineering. Students can participate in the work-study programme, as full-time employee and continue his/her final year of study after that. Most of the students appreciated that the work-study experience was a precious opportunity to learn from what a professional engineer actually do before kick-starting their career.

Participating companies include:
- CLP Power Hong Kong Limited
- Electrical and Mechanical Services Department, HKSAR Government
- HSBC (The Hong Kong and Shanghai Banking Corporation Ltd.)
- MTR (Mass Transit Railway)
- SmarTone Telecommunications Ltd.
- VTech Telecommunications Ltd.
- ASM Assembly Automation Ltd.
- Hong Kong Science and Technology Park

Overseas Exchange Programme 海外交流計劃

EE students can gain international exposure by going for a short term or year-long overseas exchange. Examples: University of Pennsylvania (USA), Technical University of Denmark (Denmark), Karlsruhe Institute of Technology (Germany), KTH Royal Institute of Technology (Sweden), Nanyang Technological University (Singapore)

EE students having an extraordinary learning experience in visiting technology giants and start-up companies in Silicon Valley, California during July 22 - August 2, 2019.

BANG, Tae Won

Mr. Leung Ho Man
Received the prestigious Innovation and Technology Scholarship to support his one-year exchange programme to the University of Liverpool in the UK in 2019-20.
Comprehensive Learning Environment  全方位學習環境

The Teaching Laboratory II and showroom with the latest equipment were newly opened from 2021.

Undergraduate STEM Ambassador Programme  STEM 學生大使計劃

The "50th Anniversary Undergraduate STEM Ambassador Programme" is conducted by our Undergraduate STEM Ambassadors, coaching other CUEE peers or/and secondary students. Students could enrich their electronic engineering background by learning and applying theoretical engineering knowledge to real-life applications.

Innovation and Research  創新與科研

Research Assessment Exercise 2020 (RAE 2020), which is an extensive independent assessment of research performance of the eight UGC-funded universities in research over a period of 6 years from year 2015 to year 2020. Electronic Engineering of the Chinese University of Hong Kong received 87%, the highest proportion of world leading (4*) and internationally excellent (3*) research within the Electrical and Electronic Engineering area in Hong Kong, according to RAE 2020 by the University Grants Committee of Hong Kong.

Our Engineering cares neighborhoods  我們的工程關愛社群

We developed wearable blood pressure sensor to provide 24x7 healthcare monitoring services.

We developed an underground wireless smart drainage system for the Drainage Services Department.

We developed an A.I. speech recognition APP for speech disorder detection & keeping voices of someone who is losing ability to speak.

We train you to become a well-rounded engineer
